

Peter Nguyen
Senior Software Engineer

ng.peter.sky@outlook.com | Słupsk, Poland | www.linkedin.com/in/peter-nguyen-4680793b7/

Summary

Experienced Senior Software Engineer with 8 years in Salesforce and AWS serverless ecosystems, specializing in building custom Lightning Web Components and backend integrations. Proficient in Apex, Java, TypeScript, and API-driven architectures, with hands-on experience delivering high-complexity projects in digital health, enterprise identity, and B2B quoting platforms. Skilled in AI-assisted development workflows using GitHub Copilot and Claude to accelerate code-first delivery and reduce manual effort. Adept at collaborating in Agile squads, participating in architectural discussions, and seamlessly connecting Salesforce front-ends with serverless backends.

Skills

- **Programming Languages:** Apex, Java, TypeScript, JavaScript, SQL, SOQL, SOSL
- **Frontend Development:** Lightning Web Components (LWC), HTML5, CSS3, React, Next.js
- **Backend & Cloud:** AWS Lambda, API Gateway, SNS, SQS, Serverless Framework, Terraform
- **CI/CD & DevOps:** Git, GitHub, Jenkins, GitHub Copilot, Salesforce DX, CI/CD Pipelines
- **Integration & Middleware:** REST API, SOAP API, Webhooks, JSON, XML
- **Testing & Quality:** Jest, Jasmine, Selenium, Postman, Unit Testing, Apex Testing
- **Project & Collaboration Tools:** Jira, Confluence, Agile/Scrum, Slack, VS Code
- **AI & Automation:** GitHub Copilot, Claude, Agentic AI coding, Salesforce Agentforce experimentation

Work Experience

Accenture | Senior Software Engineer | Aug 2024 - Present

- Developed dynamic quote calculation modules in **Apex, AWS Lambda, API Gateway, TypeScript** integrating complex business logic for the QuantumQuote Automation Engine.
- Built custom **Lightning Web Components (LWC)** for quote configuration screens supporting over 500 daily sales operations.
- Implemented **event-driven integrations** using SNS and SQS to handle asynchronous approval notifications and data routing.
- Wrote **Java/TypeScript middleware** to orchestrate backend workflows between Salesforce and AWS serverless functions.
- Automated CI/CD deployments for Salesforce metadata using **Git, Terraform** tracking over 200 artifacts per release.
- Leveraged **GitHub Copilot** to accelerate code generation for repetitive logic, saving approximately 30 hours per sprint.
- Collaborated in Agile sprints, participating in backlog refinement and architectural discussions for the quote engine.

Novo Nordisk | Senior Software Engineer | Apr 2021 - Aug 2024

- Contributed to the **Digital Patient Engagement Suite** by integrating Salesforce front-end with AWS Lambda services to deliver patient onboarding and adherence modules.
- Developed **LWC components** for interactive treatment education interfaces impacting over 2000 patients.
- Implemented secure **API Gateway** integrations to synchronize patient and HCP data across multiple internal systems.
- Built backend logic in **Java and TypeScript** to manage treatment notifications and asynchronous workflows using SNS and SQS.
- Enhanced CI/CD deployment pipelines with **Git, Salesforce DX**, managing 150+ releases across patient engagement and HCP portals.
- Utilized **AI coding assistants** to streamline repetitive development tasks and reduce onboarding time for new modules.
- Collaborated with Agile squads in architectural discussions and sprint ceremonies to optimize platform integrations and custom business logic.

Deloitte | Application Engineer | Dec 2018 - Mar 2021

- Worked on the **Enterprise Identity Access Hub**, integrating Salesforce with backend identity services to manage role-based access workflows.
- Developed **Apex triggers** and **LWC components** to automate user access requests, approvals, and lifecycle operations.
- Built middleware in **Java and TypeScript** to synchronize identity data across multiple enterprise systems using REST APIs.
- Implemented CI/CD pipelines using **Git and Salesforce DX** to manage 100+ deployments with accurate version control.
- Leveraged **AI coding assistants** to accelerate validation scripts and repetitive backend logic creation.
- Participated in Agile ceremonies, contributing to backlog grooming and architectural decision-making for digital transformation platforms.

Objectivity Inc | Web Developer | Jul 2017 - Nov 2018

- Contributed to the **Financial Workflow Portal** by developing Apex logic and LWC components to streamline case-based operations for financial clients.
- Implemented **JavaScript/TypeScript** middleware to connect Salesforce with legacy systems for operational data access.
- Developed custom UI interfaces supporting approximately 150 daily users in workflow tracking and reporting.
- Utilized **AWS Lambda** triggers to automate notifications and backend processing for internal workflow tasks.
- Maintained CI/CD deployments through **Git and Salesforce DX**, ensuring version control of 50+ artifacts per sprint.
- Participated in Agile squads, contributing to project planning, testing, and deployment discussions.

Education

- **Hanoi University of Science and Technology | Bachelor's Degree | Computer Programming | Hanoi, Vietnam | 2013 - 2017**
