

SUMMARY

Senior Data Engineer with 8 years of experience across data engineering, backend development, cloud data platforms, and analytics enablement in digital products, travel technology, logistics, and enterprise transformation projects. Experienced in building reliable data pipelines, integrating APIs and operational systems, modeling business data, and delivering well-structured datasets for reporting, analytics, and product use cases. Strong hands-on background in Python, SQL, cloud services, distributed processing, and modern data platform practices, with exposure to both engineering-heavy and analytics-focused environments. Comfortable working with cross-functional teams to connect siloed systems, improve data usability, and support broader digital and data initiatives.

SKILLS

- **Languages:** Python, SQL, T-SQL, PySpark, Bash, JavaScript, TypeScript
- **Data Engineering:** ETL, ELT, Data Pipelines, Data Integration, Data Transformation, Data Modeling, Data Wrangling
- **Big Data & Processing:** Apache Spark, Databricks, Spark SQL, Delta Lake, Batch Processing
- **Cloud & Platform Services:** Microsoft Azure, Azure Databricks, Azure Blob Storage, Azure Data Lake, Azure Functions, Azure Synapse Analytics
- **Databases & Storage:** PostgreSQL, SQL Server, MySQL, Azure SQL, Data Lakes, Data Warehouses
- **Orchestration & Integration:** Apache Airflow, Azure Data Factory, REST APIs, JSON, Event-driven Processing
- **Analytics & BI:** Power BI, Excel, Pandas, NumPy, Reporting Data Marts
- **Data Quality & Governance:** Data Validation, Data Quality Monitoring, Data Lineage, Metadata Management, Governance Support
- **Backend & Services:** FastAPI, Flask, API Integrations, Microservices, Authentication Flows
- **DevOps & Delivery:** Git, Azure DevOps, CI/CD Pipelines, Docker, Release Support
- **Business Apps & Collaboration:** Power Apps, Technical Documentation, Cross-functional Delivery, Vendor Collaboration

PROFESSIONAL EXPERIENCE

Future Mind | Senior Data Engineer | Remote | 08/2025 - Present

- Contributed to Retail Insights & Loyalty Platform initiatives by building backend integrations and data processing components using **Python, SQL, REST APIs, FastAPI**
- Developed batch jobs and data flows to move mobile application events into structured reporting layers using **PySpark, Databricks, Azure Blob Storage**
- Worked with semi-structured application and customer data, standardizing records for downstream analytics and operational reporting using **Data Transformation, SQL, Pandas**
- Added monitoring and validation checks across around 10 recurring data jobs to improve reliability and issue visibility using **Data Quality Monitoring, Logging, Azure DevOps**
- Partnered with analysts and product stakeholders to shape reusable datasets for dashboards and customer insights using **Power BI, Excel, Data Modeling**
- Supported production releases and data operations handling approximately 7 million event records per day across reporting and customer-related workflows using **Databricks, Spark SQL, Delta Lake**

eSky Group | Senior Data Engineer | Poland | 05/2023 - 06/2025

- Worked on Booking & Payments API initiatives while expanding into data-focused delivery across booking, pricing, and payment domains using **Python, SQL, REST APIs**
- Built ETL processes to ingest and organize travel platform events into analytics storage for reporting and operational analysis using **PySpark, Databricks, Azure Data Factory**
- Integrated external provider data and internal services into curated datasets by combining **API Integrations, JSON processing, Azure Blob Storage**
- Improved data observability and job support processes across around 14 scheduled workflows using **Airflow, Logging, Data Validation**
- Collaborated with analytics and business teams to prepare datasets for reporting, pricing analysis, and product decision-making using **Power BI, Excel, Pandas**
- Processed approximately 5 million booking and pricing records per day into structured marts and reporting tables using **Spark SQL, Data Modeling, Data Warehousing**

InPost | Senior Data Engineer | 06/2019 - 04/2023

- Worked on Locker Operations & Courier Handover API by building backend endpoints and operational data flows for parcel and courier processes using **Python, SQL, REST APIs**
- Shaped event logs into clean daily operational datasets for delivery and locker analytics using **ETL, Data Transformation, Excel**
- Supported integration of operational systems and centralized storage for downstream reporting use cases using **Azure Blob Storage, SQL Server, JSON**
- Prepared structured metrics around delivery SLA, locker utilization, and failed pickup reasons using **SQL, Pandas, Power BI**

- Helped improve internal data usability by organizing approximately 3 million daily event records into repeatable reporting datasets using **Data Pipelines, Data Modeling, Reporting Data Marts**
- Worked closely with engineering and operations teams to maintain production-ready services and reliable data outputs using **Git, CI/CD Pipelines, Technical Documentation**

Bluebik Global | Data Engineer II | 02/2018 - 05/2019

- Supported Bank Customer 360 & Consent Platform delivery by building backend services and integration logic for customer and consent-related data using **Python, SQL, API Integrations**
- Helped model business datasets and repeatable extracts for analytics and segmentation use cases using **Data Modeling, ETL, Excel**
- Worked with customer, CRM, and operational records to create more consistent datasets for reporting and campaign analysis using **SQL, Data Wrangling, Pandas**
- Maintained audit-related data flows and structured consent records supporting traceability and governance-oriented processes using **Data Validation, Metadata Management**
- Prepared data outputs for business and analytics users across around 6 recurring reporting streams using **Power BI, SQL Server, Reporting Support**
- Processed approximately 500000 customer and consent records across multiple systems into unified datasets and extracts using **Python, SQL, ETL Pipelines**

EDUCATION

- Naresuan University | Bachelor's Degree in Computational and Applied Mathematics | Thailand | 2014 - 2017
