EDUCATION

2014 - 2018

UNIVERSITY OF BELGRADE

- Master of Fine Arts in Digital Art & Design
- Specialized in 3D modeling, animation, and rendering for film and games.
- Completed a final project involving the creation of animated 3D characters and environments

2011 - 2014

COLLEGE OF TECHNICAL SCIENCES, JAGODINA

- Bachelor of Arts in 3D Animation
- Focused on 3D modeling, digital art, and visual communication.
- Gained foundational skills in 3D software and graphic design techniques.

PROFILE

I am a dedicated 3D artist with hands-on experience in modeling, rendering, and animation. I love creating realistic and imaginative 3D visuals, always focused on delivering high-quality results. I approach every project with a proactive mindset, ensuring that I meet deadlines and exceed expectations. My passion for 3D art drives me to continuously learn and improve my skills.

WORK EXPERIENCE

Nordeus

2024.02 - 2024.11

3D Artist

- Modeled and sculpted five ultra-realistic male models and five ultra-realistic female models with different body fat percentages.
- Applied 3D product animation and 3D textures in 8K resolution to ten human models with different body fat percentages, taking into account the changes in striated muscles, wrinkles, muscle definition, and cellulitis.
- Designed a method for morphing between different body fat percentages without increasing the file size and delivered the files in a real-time AR-ready format.
- Modeled several ultra-realistic 3D human male and female bodies for a fitness app. Developed a system for the models to morph depending on the user's body fat percentage, enabling users to compare their bodies to the model and adjust their diet.

Vega IT

2022.11 - 2023.9

3D Modler

- Modeled high-quality 3D assets, including characters, props, and environments, using Blender and Maya, ensuring accuracy and realism.
- Created optimized low-poly models for real-time applications while maintaining visual fidelity.
- Collaborated with texture artists to unwrap UVs and apply realistic textures for seamless integration into scenes.
- Worked closely with animators to ensure proper topology and smooth deformation of models for animation.

GameCredits

2022.02 - 2022.10

3D Artist

- Modeled and textured high-quality 3D assets, including characters, props, and environments for a mobile RPG game, ensuring high performance and visual appeal.

TECH SKILLS

- 3D Modeling & Sculpting(Blender, 3ds Max...)
- Texturing & UV Mapping (Substance Painter...)
- Rigging & Animation (Character Rigging...)
- Lighting & Rendering (Arnold, V-Ray, Redshift...)
- Game Engines (Unreal Engine, Unity...)
- Effective Communication
- Scripting
- VR/AR

PERSONALSKILLS

- Creative artist
- Good Public Relations
- Strong Teamwork
- Punctual Time Management
- High Leadership
- Effective Communication
- Critical Thinking

LANGUAGE

- Serbian - Native
- English - Fluent

- Created realistic and stylized 3D models with attention to polygon count and UV unwrapping to optimize assets for real-time game engines like Unity and Unreal Engine.
- Developed and implemented in-game 3D animations for character movement, including walking, running, and combat sequences, ensuring smooth transitions and lifelike action.
- Collaborated with the game design team to create interactive 3D environments, applying lighting, shaders, and textures that matched the game's aesthetic and story.

Simulacrum

2020.10 - 2021.10

3D Artist

- Modeled and textured a wide range of 3D assets, from characters to environment elements, ensuring they were optimized for real-time gameplay.
- Developed realistic animations for game characters, including idle, walk, and combat movements, maintaining fluidity and responsiveness.
- Collaborated with the design team to iterate and refine 3D assets based on feedback, ensuring alignment with the game's overall visual direction.

Croteam

2020.03 - 2022.05

3D Animator

- Produced high-quality 3D animations for characters and creatures, focusing on realistic movement and facial expressions to enhance player immersion.
- Optimized animation sequences for performance, ensuring smooth playback within the game engine while maintaining visual fidelity.
- Worked alongside the development team to refine animations based on feedback and ensure they aligned with the overall game mechanics and narrative.

Nordeus

2018.10 - 2019.09

3D Modeler

- Modeled and sculpted 3D assets for mobile games, including characters, props, and environments, ensuring high visual quality and game performance.
- Created realistic textures and applied UV maps using Substance Painter and Photoshop to enhance asset detail and visual appeal.
- Worked closely with animators to ensure models were optimized for rigging and animation, maintaining smooth integration within the game engine.
- Collaborated with the design team to create assets that fit the game's overall art style and met project requirements for optimization.
