KYRYLO VAKULENKO

SENIOR FULLSTACK DEVELOPER

ABOUT ME

I am a full-stack developer with experience in building and maintaining web applications. I work with both frontend and backend technologies to create efficient, scalable solutions. I focus on writing clean, maintainable code and solving problems effectively. I have experience with modern frameworks, databases, and cloud services. I enjoy collaborating with teams and continuously improving my skills to stay updated with industry trends.

WORK EXPERIENCE

Intetics Odesa 2024.06 -2024.10
Backend Developer

- Helped build a portal that allows users to see and control the impact of the advertising product on their business.
- Used Jira and worked harmoniously with the team to deliver the project on time.
- Maintained consistency and stability of the existing app throughout the engagement by employing a test-driven approach.

Solar Digital 2023.10 - 2024.04
Fullstack Developer

- Developed a new administrative system from the ground up using React and JavaScript to build a single-page application and Laravel and PHP 7 to provide a GraphQL API.
- Migrated the legacy system seamlessly to the new administrative system by utilizing SQL views to integrate the old database while ensuring backward compatibility.
- Integrated Amazon's MWS API to automate the administrative work to keep products and their stock in sync.
- Incorporated the REST API by Mailchimp and the SOAP API by Mediafinanz to send payment warning emails to customers in specific time intervals and send claims to the collection department.
- Led the development of a robust and encrypted backup system that used AES-256 and RSA for encryption.

Synebo 2023.02 - 2023.8
Frontend Developer

- Integrated Amazon's MWS API to automate the administrative work to keep products and their stock in sync.
- Incorporated the REST API by Mailchimp and the SOAP API by Mediafinanz to send payment warning emails to customers in specific time intervals and send claims to the collection department.
- Led the development of a robust and encrypted backup system that used AES-256 and RSA for encryption.
